

Market Squid Fishery Management Plan List of Tables

Table 1-1. Contribution of management measures to ecological goals and objectives of the Marine Life management Act and the Market Squid Fishery Management Plan	8
Table 2-1. Known fish, bird, mammal and invertebrate predators of coastal pelagic species, including market squid	27
Table 2-2. Historical market squid landings in tons for California divided at Point Conception into northern and southern fisheries.....	30
Table 2-3. Description of gear types.....	32
Table 2-4. Historical California landing receipt information for permitted and non-permitted vessels, 1981-1982 to 2002-2003 seasons.....	35
Table 2-5. Vessel and light boat permit issuances, 1998-99 to 2000-01 seasons.....	38
Table 2-6. Percent frequency of occurrence of observed market squid incidental catch by port area.	41
Table 2-7. Market squid volume and value exported and respective rankings for 1990 through 2000 (last year data available).	42
Table 2-8. Market squid landings (in tons) by port area	43
Table 2-9. Dollars paid ex-vessel for market squid by port area	44
Table 2-10. Dollars paid ex-vessel by gear type for market squid fishery from 1981-1982 to 2001-2002 seasons.....	45
Table 2-11. Percent of revenue received by port area complex from 1981-1982 through 2001-2002 fishing seasons.	46
Table 2-13 Summary of Market Squid Regulations from 1959 to the present.	57

Table 3-1. Summary of Impacts for Market Squid FMP Preferred Options.	62
Table 3-2. Summary of Impacts for Market Squid FMP No Project Options.....	66
Table 3-3. Summary of Impacts for Market Squid FMP Other Options.	69
Table 3-4. Seasonal market squid landings by region.....	77
Table 3-5. Landing limits based on default limit control rule*.	78
Table 3-6. Landings limits based on B_{MSY} limit control rule by region	78
Table 3-7. Landing limits based on default limit control rule* using the 2002-2003 season as the last year.	79
Table 3-8. Percent of landings by currently permitted vessels by amount landed daily.	89
Table 3-9. Estimated revenue loss if daily trip limit established based on landings from the 1998-1999 season through 2002-2003 season.....	91
Table 3-10. Estimated revenue loss if daily trip limit established for brail gear based on landings from the 1998-1999 season through 2002-2003 season	92
Table 3-11. Number of vessels landing market squid greater than two tons	94
Table 3-12. Tons landed per hour lighting for squid.	98
Table 3-13. Recent landings of market squid less than or equal to two tons by season.	100
Table 3-15. Summary of maximum and average seasonal vessel participation, 1981- 2000	108
Table 3-16. Market squid vessel capacity goal options	110
Table 3-17. Summary of SFAC recommended criteria for initial issuance of a limited entry permit.	116

Table 3-18. Number of vessels qualifying for transferable market squid vessel permit based on a minimal number of landings and the possession of a 2003/2004 market squid permit	117
Table 3-19. Number of vessels qualifying for transferable market squid brail permit based on a minimal number of landings.....	117
Table 3-20. Number of light boats qualifying for transferable light boat owner's permit	118
Table 3-21. Number of light boats qualifying for transferable light boat owner's permit	119
Table 3-22. Dollars paid ex-vessel for landings greater than two tons divided between vessels that qualify under the proposed project and those that do not qualify.	121
Table 3-23. Potential economic affects to counties from initial issuance criteria.	121
Table 3-24. Percent participation in other fisheries by current squid permittees (2002- 2003 season) by tons landed.	122
Table 3-25. Summary of proposed project initial issuance limited entry criteria	124
Table 3-26. Range of fees for transferable and non-transferable market squid vessel, brail and light boat owner permits	125
Table 3-27. Seabird species that breed (indicated by an X) on Anacapa, Santa Barbara, and San Miguel islands in the Channel Islands.	142
Table 3-28. The federal and state status of seabirds in California state waters	142
Table 3-29. Chick mortality, nest abandonment and overall productivity (chicks fledged per nest attempt) data for brown Pelicans nesting at Anacapa Island	149

Table 3-30. Comparison of market squid landings at three Channel Islands during two closure periods to total annual landings and southern California landings..... 153

Table 3-31. Number of daytime sets in southern California for the proposed closure months (01 February through 30 September) according to logbook data. 154
